

# The Future of Mobility, According to Fleet Managers

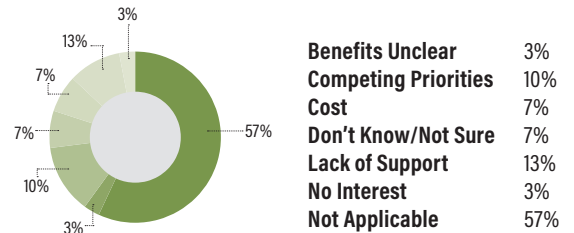

We asked your fleet peers to share their thoughts on the topic of mobility: the different solutions, strategy planning stages, and benefits.

Here are a few highlights of what they told us.

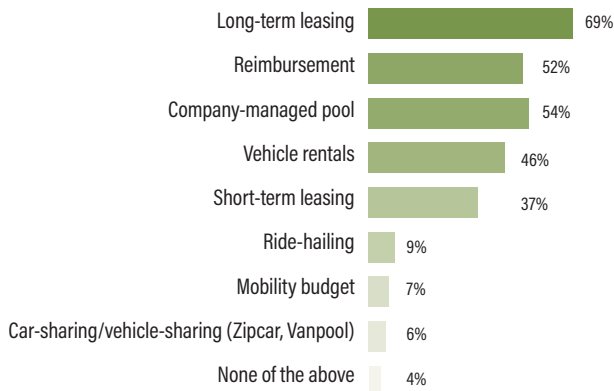

## Mobility Strategy | Stage of planning

## Mobility Strategy | No Interest/Planning

## Mobility Solutions | Current Use

## Mobility Solutions | Expected Benefits

- Reimbursement: Easier to manage, or lower costs
- Ride-hailing: Improved utilization or convenience/ease of use
- Car-sharing/vehicle-sharing: Lower costs
- Company-managed pool: Lower costs
- Mobility budget: Lower costs

## The Future of Mobility | Autonomous Vehicles

- Majority of fleet professionals do not expect autonomous vehicles to impact the fleet space nor their business in the next 3-5 years.
- Autonomous vehicles need to offer improved safety and lower costs in order to be attractive to the majority of respondents.
- Majority of organizations currently do not have an autonomous vehicle strategy or plans to begin development.
