

NOW AVAILABLE!

Updated FleetView Dashboard: Fuel Transactions –  
Enhanced to support electric vehicles (EVs)

We are pleased to announce the updated Fuel Transactions report is now available in FleetView™. This dashboard provides transaction level detail on what is one of your fleet’s biggest expenses. The reporting details can also be scheduled to be delivered right into your email box on a daily, weekly, or monthly basis.

- Login today to view the following:
- Detailed fuel transactions, viewable by transaction period or billing period.
  - Data and filters to identify potentials exceptions to your fleet policy, including fuel type, non-fuel purchases, and after-hours purchases.
  - Addition of unit of measure to differentiate between different fuel sources, including electricity for EVs

Fuel Compliance

CO2 Emissions

Fuel Transactions

Defined Transaction Period

Showing US fuel transactions that occurred between 6/22/2021 and 7/21/2021

Custom Transaction Month

The Fuel Transaction dashboard provides a detailed view into fuel purchases. By default, this dashboard displays the previous 30 days of fuel transactions, and can be adjusted to different time periods. Filters can be applied to identify trends and exceptions, such as non-fuel purchases, after hours or weekend purchases, and transactions over a certain threshold.
