

## New FleetView Dashboards! Toll Management & Violations

Wheels is excited to announce our latest expansion of our interactive reporting tools: Toll Management & Violations dashboards.

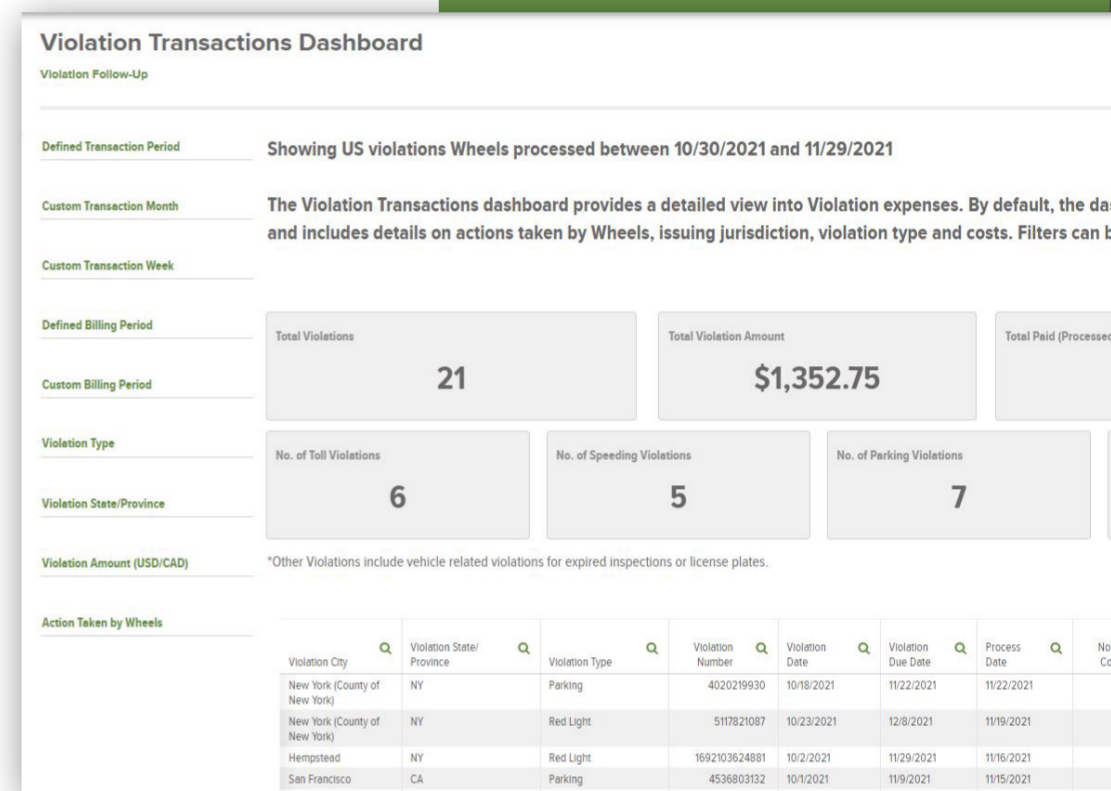

The Violations Management dashboards provide insights to violations received and processed by Wheels. There are two dashboards available:

1. Violations Transactions: violations incurred by drivers, violation type, issuing jurisdiction, date, cost, and actions taken by Wheels.
2. Violations Follow-up: violations where reimbursement was requested from the driver, all violation details, driver communication dates, and outstanding driver payments. In addition, see credits issued from Follow-up Advantage.

The Toll Management dashboards provide insights to vehicles enrolled on the Wheels Toll Management program. There are two dashboards available:

1. Toll Transactions: toll road usage by driver, tolling region, location, day of week or time of day.
2. Toll Fulfillment: vehicles enrolled, enrollment date, assigned tolling materials, toll materials ship date and locations.

With robust filtering, individual vehicle-level visibility, and scheduling capability, our interactive dashboards contain important data and analytics to help you optimize your fleet.
