

# HURRICANE PREPARATION TIPS

Hurricanes can cause serious life-threatening hazards. Being prepared can help you stay safe during extreme weather conditions.

## Prepare your vehicle

Ensure your vehicle has no overdue repairs and your spare tire is in good working condition. Fill gas tanks or charge your vehicle before the storm hits. Fueling and charging stations may be out of service or have limited supply.

## Pack a safety kit

Include supplies such as flares, flashlight, canned food, water, maps and cash for emergency purchases.

## Postpone non-essential repairs

Hold off on repairs and maintenance so vehicles are not at a service location during the storm.

## Allow for more travel time

Planning ahead is important. Traffic jams occur often during these situations. Allow more time so you're not rushing and putting yourself in harm's way.

## Seek shelter

Watch surroundings carefully and, if possible, move vehicles to high ground. Never drive through standing water or barricades.
